

## **INTRODUCTION TO METRO RF SERVICES**

Metro RF Services, Inc. (a spin-off of Metro Wireless Communications established in 1986), was founded in 2001 to provide engineering and infrastructure development services to support the rapid expansion of the emerging wireless industry. Over a decade later, Metro RF Services has grown to become a premier, full-service contractor providing project management, civil, electrical, and implementation services covering all aspects of today's rapidly evolving telecommunications industry. With offices located in California, New Jersey, and Florida, Metro RF Services has managed infrastructure implementation projects for both the public and private sectors across the country. Our strong project management and seasoned field personnel manage all projects hands-on to ensure complete satisfaction for all clients.

## **SAFETY**

Metro RF Services places safety at the forefront of everything we do. Our staff is trained to identify all potential hazards and unsafe work conditions prior to beginning work on all jobsites. Our impeccable safety record is a testament to the commitment to safety that Metro RF Services lives by.

## **CERTIFICATIONS & TRAINING**

Metro RF Services provides OSHA, ComTrain, CPR/First Aid and other certification training through our full-time, in-house safety professional and offers regular training and refresher courses in Electrical Safety, Fall Prevention, RF/EME Awareness, and Man-lift safety to name a few.

Metro RF's Training University courses are updated regularly to ensure all employees are ready to take on any project at any time. Regular training, certification, and refresher classes are attended by Metro RF Services staff to ensure we stay on top of today's ever evolving telecommunications industry and changing technologies.

## **PROJECT & CONSTRUCTION MANAGEMENT**

From concept to construction, Metro RF's Project and Construction Management team guides partners through complex projects with proficiency and exceptional results.

Metro RF has a proven track record of providing knowledgeable, trained, and experienced staff supported by a comprehensive and integrated project controls system. With in-depth experience in all phases of the project life cycle, we have successfully completed thousands of builds, site upgrades, and maintenance projects with proven results.

Metro RF identifies the required services and establishes realistic scopes of work and budgets that are cost effective and achievable. This is essential to the successful completion of the project and fulfillment of the client's expectations - on time and within budget.

We are staffed with site acquisition, technical, construction, consulting, and maintenance personnel and have applied years of knowledge into turnkey project management solutions for our clients.

## **TECHNICAL SERVICES**

Metro RF stays ahead of the curve with a complete range of technical services utilizing the latest technology and training. We monitor the latest industry research and development to deliver the most advanced and cost-effective technical services to our clients.

## **SUPPORT SERVICES AND OPTIMIZATION**

Metro RF offers a wide range of site acquisition, engineering, new site build, microwave, small cell, IoT, tower, antenna and transmission line maintenance, civils, RBS and BTS integration and commissioning, electronic vehicle charging station installation and maintenance, and SME support services. Metro RF's personnel are equipped, trained and experienced in all aspects of the testing, maintenance and inspection of electrical, electronic, RF and grounding systems.

During any phase of the project - planning, construction or operation - Metro RF has the experienced personnel to handle your electrical and electronic testing and certification needs. Metro RF and its affiliates have the capability to test and certify everything electrical and electronic - from incoming electrical power to RF transmissions to fiber.

## **MAINTENANCE**

Metro RF's team of professionals has the knowledge, the experience, the ability and the equipment necessary to provide clients with the most cost-effective maintenance and support solutions to meet their project needs. Metro RF works with clients to establish a periodic inspection and maintenance program that addresses each site's particular requirements.

Upon request, Metro RF will provide an emergency response and repair program to service unforeseen outages. Whether it's a sector down or electrical feeds, response times are critical, and with Metro RF on your team, you are assured the frequency and duration of downtime will be greatly minimized.

Majority tickets are completed within 24-48 hours from the time they are received.

## **TOWER / SITE CONSTRUCTION SERVICES**

Metro RF has the crews, the tools and the experience. Our construction crews can perform every phase of the job, from clearing to fencing, grading to landscaping. From rooftops to water towers, monopoles to lattice towers, whip antennas to stealth panels, Metro RF's crews are all experienced in tower erection, as well as antenna and transmission line installation and alignment. Metro RF has the crews, the tools and the experience.

We are fully equipped and mobile. When clients call, their needs are often immediate, and they can't afford to wait. Metro RF's tower crews are fully equipped to handle any job, anywhere, anytime. Metro RF maintains a full line of tools, equipment and vehicles, enabling its crews to respond as soon as possible to problems or projects.

We make safety a top priority. For Metro RF's crews, safety is the keyword on all jobs and the first priority. Metro RF's crews realize and understand the inherent dangers in their job, and they exercise the highest degree of caution as a result. We have the newest OSHA-approved safety equipment and inspect it daily. Metro RF's techs are regularly trained in all aspects of safety, including rescue recovery and fall safety through regular briefings held to ensure that safety remains in the forefront of their daily routine.

## **TENNANT IMPROVEMENTS**

General maintenance and upkeep visits help to keep your sites compound well-groomed throughout the growing season. This service allows us to prune, weed and care for your entire landscape as the need arises, keeping your cell site looking its best throughout the year.

Most common request from our clients are overgrown brush removal, spray total vegetation killer, debris removal and site clean-up, grass trimming and weed abatement, animal and pest removal, vandalism repair, and graffiti removal. Upon completion of work, all service requests are followed up with detailed reports and photos.
